

Backend Developer – Berlin – (x)

Vertical Scale is a Berlin-based advisory company founded in 2017. Our client base ranges from startups and investment companies to corporates and universities. Besides buy and sell side transaction consulting, Vertical Scale offers various services from Business Development, Strategy Optimization and Technology Support among others.

For one of our current Fintech projects we are looking for a Backend Developer to join our team.

Responsibilities:

- You will be responsible for building software applications to provide the technical architecture of Web sites & Web-based software products.
- You will help bring digital applications to life by creating robust enterprise platforms to support rich and interactive back-ends.
- You will gather technical data and design algorithms required to support technological solutions.
- You will continuously develop and optimize our websites.

Requirements:

- Excellent knowledge of web technologies including HTML, Solidity, Java, Python, JavaScript, Swift.
- Experience in the field of Internet technologies and protocols, such as PHP, HTML5, CSS3 and JavaScript.
- Good knowledge of web based backend technologies.
- Strong analytical & conceptual skills and a high programming affinity.
- Ability to demonstrate leadership, technical curiosity, creativity as well as forward thinking with a passion for growth and innovation.
- Able to work well individually and within a team.
- Positive attitude and willingness to learn.

We offer:

- A competitive salary & compensation package
- Freedom and own responsibility
- A variety of challenges & wide-ranging projects
- A dynamic, open and inspiring working environment with flat hierarchies.
- The opportunity to implement innovative ideas, to fully develop your own potential and to make a difference.
- The opportunity to work directly with the founders.
